## **Stratex International discovers new gold zone at Altintepe project in Turkey**

LONDON (Thomson Financial) - Turkey-focused exploration and development company Stratex International PLC said it has discovered a new large target gold zone and extended existing mineralisation at its Altintepe project.

Stratex believes that the new zone and the mineralisation extensions have the potential to significantly increase the project's current resource of 311,543 ounces of gold. Stratex's aim is to build a resource base that can be developed through to production.

It added that drilling is due to start shortly at Altintepe, while drilling at the Doganbey porphyry prospect is on-going.

It also said it continues to define further targets in the Konya region and is looking at other projects outside the country. TFN.newsdesk@thomson.com apm/tsm/lht
