

MINING RESEARCH

**Stratex International
Konya Update****2.25p****30 March 2009**

Stratex has announced the results of its exploration drilling in the Konya volcanogenic belt. The results, although uneconomic, have substantially improved the company's knowledge of the geological controls and indicated further mineralisation with a fourth porphyry system at Kozlu and the potential for a fifth at Oğlakçı. Teck Cominco's decision not to take up its option on the project is in line with its stated objective of cutting exploration expenditure this year to focus on repaying its bridge and term loans. This leaves Stratex with 100% control of the project.

This move will significantly enhance Stratex's ongoing discussions with a number of parties interested in its exploration portfolio. We believe that the current market capitalisation of nearly £5m substantially undervalues Stratex's assets, which after cash of £3m is only \$2.83 per ounce. We believe that this valuation completely ignores the company's current fully funded exploration.

Stratex has announced the initial results from a reverse circulation drilling programme targeting new porphyry systems in the Konya Volcanic Belt. Ten holes were drilled in total at Doganbey, Gölcük and Karacaoren (See Figure 1, page 3).

Four holes were drilled at Doganbey, with two intersecting consistent gold grades. One hole, DOSRC-01, in the southern extension of the Doganbey prospect, returned 155m at 0.15 grammes per tonne (g/t) before it was terminated still in mineralisation (See Table 1, page 2).

At Gölcük, two holes were drilled, again confirming significant gold anomalies above 0.01g/t over significant lengths (40m in GOLRC-01).

Finally four holes were drilled into the Karacaören system with three returning long intersections of over 0.1 g/t Au, including 170m at 0.17 g/t and 70m at 0.27 g/t.

All these results, although not economic in themselves, are indicative of the high prospectivity of the region and Stratex has restated its belief that the district has the potential to host an economic porphyry gold deposit.

This prospectivity is borne out at Kozlu prospect, 3km south-east of Karacaören, where an intrusive breccia carrying porphyry fragments cut by porphyry-type veinlets has been discovered. Anomalous gold values of up to 39 ppb Au and up to 129 ppb Au were recorded in the breccia and altered wallrocks respectively. This is indicative of a porphyry system; the fourth discovered by Stratex in the region.

Further work by Stratex has also highlighted the potential of a further hidden porphyry system at Oğlakçı, in the south-central part of the Konya Volcanic Belt. Soil geochemistry has produced anomalous gold values (up to 45 ppb Au) in soils within a substantial zone of intense hydrothermal alteration or lithocap. This target zone is also underlain by a prominent magnetic-high elliptical anomaly extending 1.5km east-west that may relate to a further near-surface porphyry system.

These results point to the considerable potential of the region which already includes Inlice, where Stratex has defined a JORC-compliant resource of 262,300 oz gold.

Teck Comino

Teck Cominco has contributed around \$1.6m to the exploration of the Konya region. However, unsurprisingly, given its decision to cut exploration expenditure due to financial problems, the company has decided not spend a further \$1.4m to take up its option on the property and earn in to 51%.

Teck Cominco took a \$5.8bn bridge loan and \$4.0bn in term debt to fund its \$13.0bn acquisition of the Fording Canadian Coal Trust. The bridge loan is due in October and the huge fall in commodity prices, in particular coal, copper, and zinc have meant that Teck is unlikely to be able to repay the entire loan by October. Teck is currently selling non-core assets and potentially core assets to reduce the loan and hopes to refinance the part it cannot pay down, (estimated by Standard and Poor's to be \$3.5bn) over longer term.

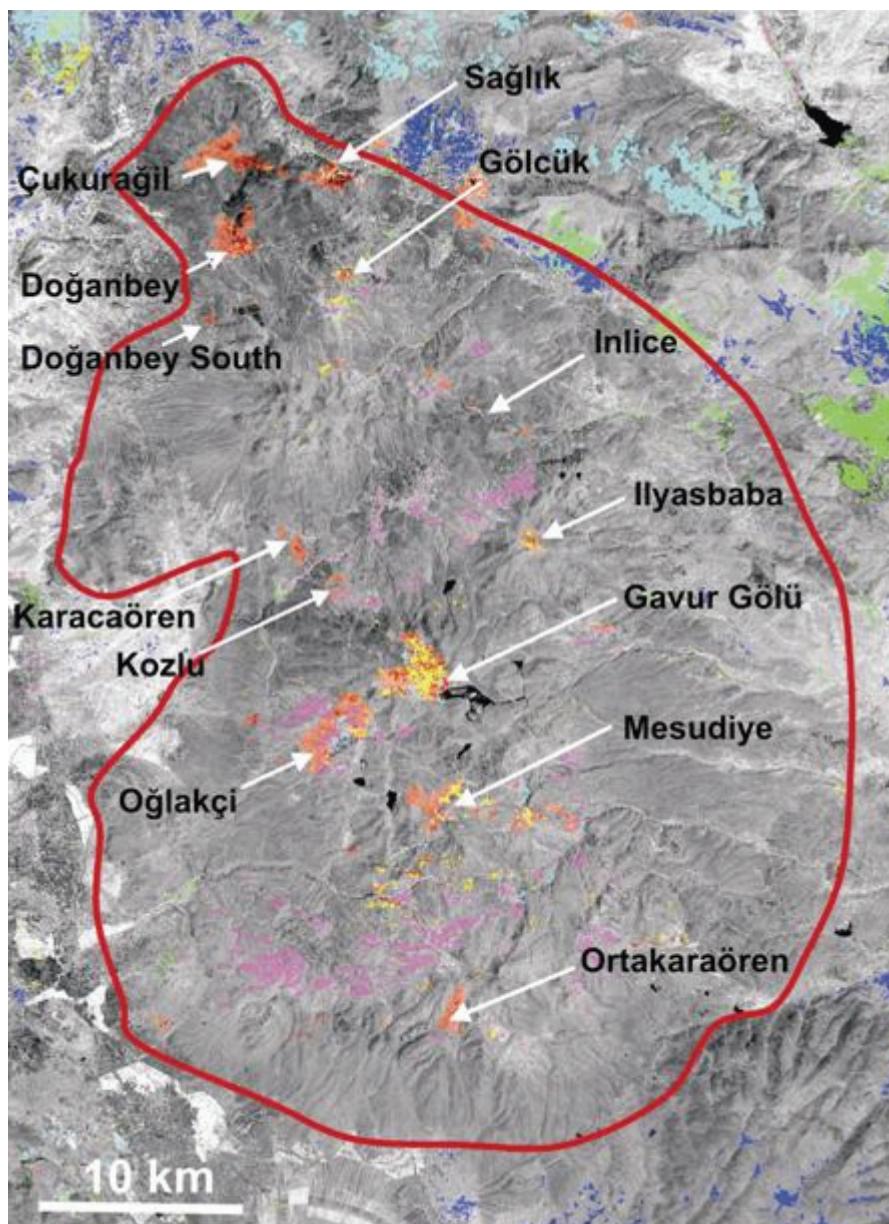

Teck Cominco is a founding shareholder of Stratex and aimed to develop any prospects identified by Stratex with a potential for two million ounces of gold. Teck retains an option on a project.

Going Forward

Stratex has stated that it is in discussions with a number of parties interested in the company's exploration portfolio, especially targeting Miocene volcanic belts which specifically includes the Konya belt. Now Teck has relinquished its option, Stratex holds 100% of the Konya Project and we expect these discussions to advance unhindered.

Stratex currently has £3.0m in cash and a total declared gold resource across its portfolio of close to 1 million ounces. We believe that the current market capitalisation of nearly £5.0m substantially undervalues Stratex's assets which, if you remove the cash position, is only \$2.83 per ounce with substantial advanced exploration upside.

Important Disclosures

Hanson Westhouse Limited is a member of the London Stock Exchange and is authorised and regulated by the Financial Services Authority. Registered in England and Wales, No. 05861129. Registered Office 12th Floor, One Angel Court, London EC2R 7HJ.

Analyst Certification

In my role as Research Analyst for Hanson Westhouse Limited, I hereby certify that the views about the companies and their securities discussed in this report are accurately expressed and that I have not received and will not receive direct or indirect compensation in exchange for expressing specific recommendations or views in this report.

Analyst Stock Ratings

Hanson Westhouse Limited uses **BUY**, **HOLD** and **SELL** as its stock rating system to describe its recommendations. Investors should carefully read the definitions of all ratings used in each research report. In addition, since the research report contains more complete information concerning the analyst's views, investors should carefully read the entire research report and not infer its contents from the rating alone. In any case, ratings (or research) should not be used or relied upon as investment advice. An investor's decision to buy or sell a stock should depend on individual circumstances (such as the investor's existing holdings) and other considerations.

Ratings are explained as follows:

BUY: We expect that over the next twelve months the share price will outperform the market by more than 15%. The market is defined as the FTSE All Share Index

HOLD: We expect that over the next twelve months, the share price will perform between +15% and -15% of the market defined as the FTSE All Share Index

SELL: We expect that over the next twelve months the share price will under-perform the market by more than 15%. The market is defined as the FTSE All Share Index

Below is the distribution of HansonWesthouse research recommendations:

BUY: 69%, **HOLD:** 17%, **SELL:** 14%

HansonWesthouse publishes the following on a quarterly basis:

The proportion of all recommendations published **BUY**, **HOLD** or **SELL**

The proportion of relevant investments in each categories issued by the issuers to which the firm supplied investment banking services during the previous 12 months.

Disclosure of ownership or Investment Banking

Hanson Westhouse Limited, its affiliates and research analysts involved in the preparation of this report have:

Managed or co-managed a public offering of securities of the subject companies mentioned in this report.

Yes No

Received compensation for investment banking services from the subject companies mentioned in this report.

Yes No

Received compensation for products and services other than investment banking services from the subject companies mentioned in this report.

Yes No

Provided or plans to provide investment banking services to, or has an investment banking client relationship with any of the subject companies covered in this report.

Yes No

Provided or plans to provide non-investment banking, securities-related services to any of the subject companies mentioned in this report, or in the past has entered into an agreement to provide services, or has a client relationship with any of the companies covered in this report.

Yes No

Hanson Westhouse Limited and its affiliates were acting as a market maker in the subject companies' securities at the time this research report was published.

Yes No

Hanson Westhouse Limited and its affiliates beneficially own 5% or more of any class of common equity securities of the subject company.

Yes No

The research analyst(s) involved in the preparation of this report and any members of their household have a financial interest in the securities of the subject company or have received any compensation from investment banking services revenues or from the subject companies in the past 12 months.

Yes No

The research analyst(s) involved in the preparation of this report or any members of their household serve as an officer, director, or advisory board member of the subject companies mentioned in this report.

Yes No

Any legal or natural person working for Hanson Westhouse is involved in the preparation of research recommendation, receives or purchases shares of the relevant issuer prior to a public offering of those shares.

Yes No

Other disclosures

This research report has been published in accordance with our Research Policy which is available on written request from Hanson Westhouse Limited.

This report does not provide individually tailored investment advice. It has been prepared without regard to the individual financial circumstances and objectives of persons who receive it. The securities discussed in this report may not be suitable for all investors. Hanson Westhouse Limited recommends that investors independently evaluate particular investments and strategies, as the appropriateness of a particular investment or strategy will depend on an investor's individual circumstances and objectives.

This report is not an offer to buy or sell any security or to participate in any trading strategy, Hanson Westhouse Limited employees and its affiliates not involved in the preparation of this report may have investments in securities or derivatives of securities of companies mentioned in this report, and may trade them in ways different from those discussed in this report.

Hanson Westhouse Limited makes every effort to use reliable, comprehensive information, but we make no representation that it is accurate or complete. We have no obligation to tell you when opinions or information in this report change apart from when we intend to discontinue research coverage of a subject company.

With the exception of information regarding Hanson Westhouse Limited, reports prepared by Hanson Westhouse Limited research personnel are based on public information. Facts and views presented in this report have not been reviewed by, and may not reflect information known to, professionals in other Hanson Westhouse Limited business areas or its affiliates.

Hanson Westhouse Limited research personnel conduct site visits from time to time but are prohibited from accepting payment or reimbursement by the company of travel expenses for such visits.
